to just a fraction?

Do you want...
to extend the operational life
of all your batteries?

Do you want...
to recondition your forklift
batteries with guarantee
service?

Call us today!
We make it easy for you.

TOP 5 REASONS TO REPAIR YOUR BATTERY

- 1. Save Money!**— We can regenerate, recondition, and rejuvenate any of your low performing and/or discarded sulfated lead acid batteries. Regenerating your battery yields substantial savings over purchasing a new one. Our battery regeneration system and battery maintenance program (for cars, trucks, forklifts) reduces battery purchasing costs by 60% or more.
- 2. Be Strategic**— It is said that “An ounce of prevention is worth a pound of cure”. Use our battery treatment services as a preventive and conclusive solution to all of your battery problems. We can provide you with replacement batteries or regenerate your old battery at rock bottom prices. All our battery treatment services and batteries are guaranteed!
- 3. Avoid headaches!**— You know that replacing your battery is always costly and time consuming. If you’re replacing your old battery, you should first consider regenerating first over buying a new one. Save yourself a headache by reconditioning an old battery that fits and meets your energy needs!
- 4. Prevent future problems**— Our technicians can design a battery treatment plan for all your lead acid batteries. We can literally double the life span of all of your batteries; and we can reduce charging time while prolonging the service time of the battery. Our battery prevention system against sulfation built-up is guaranteed!
- 5. Guarantee service**— All our services and products are labeled with guarantee coverage of 12 months or more. We will replace any recondition battery if it fails to perform above 80% due to sulfation built-up.
