

WE SERVICE VARIOUS INDUSTRIES

Discounts For First Timers

We know it is not always easy believing in new technology. If you are trying our technology for the first time we will give you a 15% discount along with our 30 day money back guarantee.

Other Services We Specialize

We have a complete business operation related to lead acid batteries. As such, we provide a venue of services tailor to support all types of lead acid batteries. Here is a list of some of the things we do:

- Reconditioning of dead or weak batteries
- Treatment of new or batteries in current use
- Routine maintenance for batteries
- Battery recycling services
- Dismantling and removal of batteries
- Diagnostics and troubleshooting
- Sale of reconditioned batteries
- Merchandising of battery related products

BATTERY SERVICES INTERNATIONAL
BATTERY SPECIALISTS

“We are forklift battery specialists! We know all about batteries. One benefit of our services is that we know how to bring back to full capacity your weak or dead forklift battery despite of state of charge, size, age, brand, or sulfation condition”

**SAFE RELIABLE
 GUARANTEED**

Sulfation Kills Forklift Batteries

Sulfation build up is the primary cause for battery failure. Sulfation is generated from lead sulfates during each cycle of charging and discharging. It accumulates in the porous walls of cell plates and bonds inhibiting power generation.

Here are some sulfation symptoms:

- Expands battery case and plates
- Causes mechanical failure
- Prolongs charging session
- Decreases runtime of the battery
- Lowers electrolyte density
- Increases battery temperature
- Extends cooling period
- Feeds corrosion in each cell
- Doubles the risk of battery explosion
- Accelerates premature death of the battery
- Creates malfunction in equipment

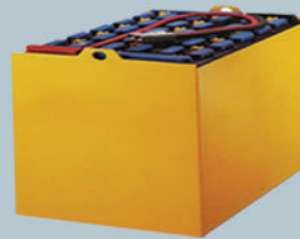

Sulfation Impact Your Costs

Sulfation has an impact on your equipment and your day to day costs. Your operation is impacted in the following ways:

- Causes frequent battery replacement
- Increases electrical consumption
- Delays delivery to customers
- Reduces operational productivity
- Creates need for frequent maintenance
- Contributes to work environmental pollution

The Result ...» Additional Costs = Lost Profits

Our battery additive PowerPlus stays inside the battery combating sulfation built up. We can bring back to life batteries completely dead. Guaranteed!

Regain Your Forklift Battery

Battery Services International has exclusive technology that can bring back to full capacity your weak or dead battery. Our battery unique restoration process blends advanced electronics with our strong battery additive PowerPlus to eliminate sulfation built up permanently from your battery. Below is a brief list of the benefits of our technology for your battery:

- Extends battery life span
- Prevents sulfation built up
- Increases battery runtime
- Reduces charging and cooling time
- Reduces battery explosions risks
- Lowers battery watering needs

Cost Benefits of Our Battery Services

One significant benefit of our battery restoration services is that it is low in costs. It is only a fraction of what you will spend in a new battery. In addition, it is safe, reliable, guaranteed and can save you hundreds of dollars in operational expenditure. In addition, it is guaranteed for twelve months.

In summary, we are committed to improving the operational and financial profile of companies that rely heavily on lead acid batteries. We take great pride in the quality of our customer service, products, and technology.
